C-Frame Guided Platen Press

10 TO 500 TON CAPACITY

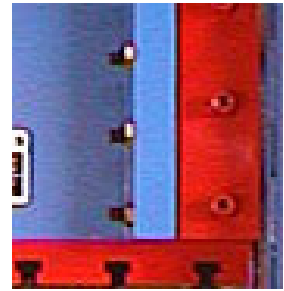

DOCUMENT 11008

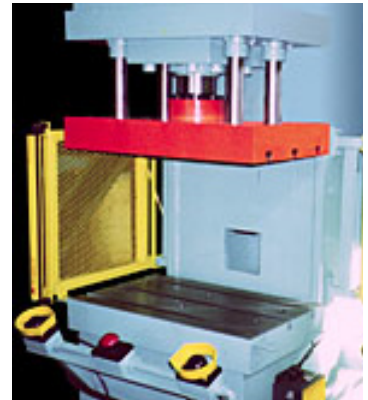

CFG Presses are available with a variety of guidance methods to meet your needs. Small platens can use 2-post (4 bushing) guidance. Larger platens use 4-post (8 bushing) guides. Each pair of bushings are separated in long bushing tubes to improve the bearing ratio. Gib guided platens are available for the most demanding applications such as punching, blanking and piercing operations.

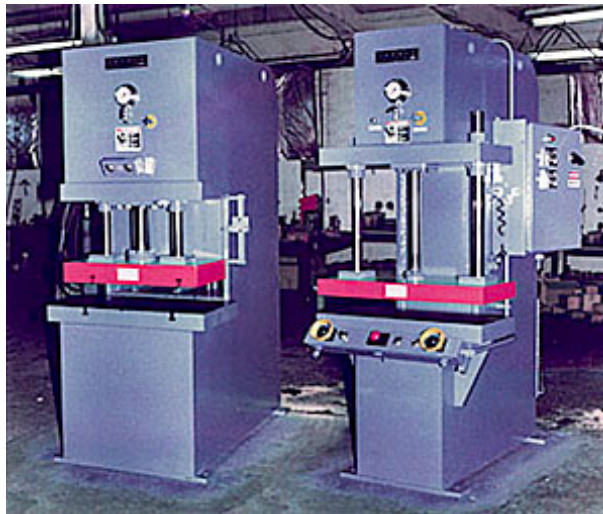

Line of Assembly Presses to Daimler/Chrysler Specifications

Gib Guided

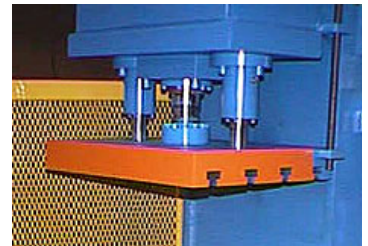

4 post/8 Bushing Guide System

Savage does not stock catalog sizes. Each press is engineered to your specifications to perform the job efficiently.

We build to any required bed size, daylight opening, throat depth, speeds, stroke and sophistication of controls.
