Triple Action Deep Drawing Press

25 TO 1200 TON CAPACITY

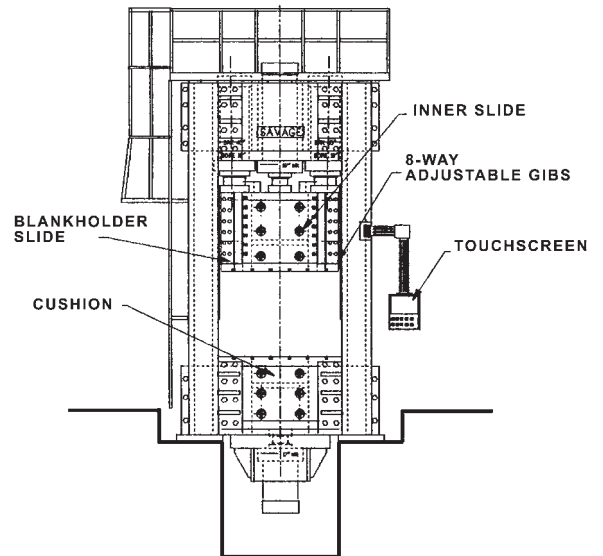

DOCUMENT 11011

Triple acting deep draw presses are available in 4 post and straight side construction with different slide configurations. The press shown is a conventional press with the punch holder slide above the blank holder (the punch die passes through a hole in the blankholder) and a hydraulic cushion located in the bed. This press is also available with the blankholder on top and the punch centered within the blank holder as an inner slide. (see drawing inset)

200 Ton 4 Post, Triple Action Draw Press

Slide within blankholder

- Full tonnage over entire stroke length.
- Blankholder and cushion pressure variable throughout stroke length. (optional)
- Electronic joystick controlled movement for Research & Development work (optional).
- High speed hydraulics.
- Fully hydraulic cushions.

- Available in four-post or straight side construction for production work.
- Bed size, stroke, tonnage and speed to your requirements.
- Safety light barrier guards.
- Manifold mounted valving
